

# Number Of Words

Write a program `NumberOfWords/main.cpp` Reads from standard input until the End-Of-File and outputs the number of whitespace separated words on each line.

Example input:

```
this line has 5 words  
this line has 6 words instead  
  
the line above has 0 words
```

Expected output:

```
5  
6  
0  
6
```
